solutions

Pains

Time Loss

MUDA

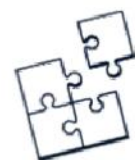

Rigidity

Solution

Seamless production flow
management through
mobile robots

Holistic production process digitalization

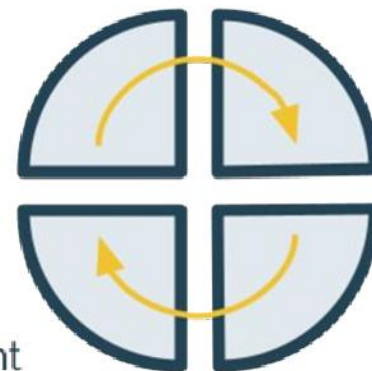

Modular and
flexible

Autonomous
navigation

Traffic management
and priority scheduling

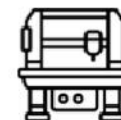

Multi-brand
compatible

No Code UI &
Digital Twin

Machinery
interoperability

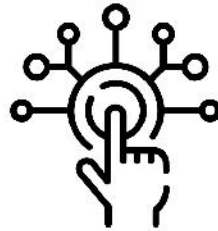

Value Proposition

Simple Integration

Complete Digitalization

Holistic Management

Use cases

Early adopters

Providing autonomous navigation software for intralogistics and professional cleaning robots.

Industrial PoCs

Managing complex production flows

- different brand AMRs traffic management
- integration with custom machine
- integration with robotic manipulators
